

Typical EMPT Industrial Application: Shaped and cutted structures

Application:

Crash box and formed cans

Materials:

Steel and Aluminum

Machine type:

PS16, PS48 and PS80

Customers:

Aluminum profile manufacturer,
Automotive Supplier

Benefits:

Major cost reduction over
hydroforming and mechanical forming,
no operator training required

Application:

Shaped and calibrated structures for different usages

Materials:

Steel and Aluminum

Machine type:

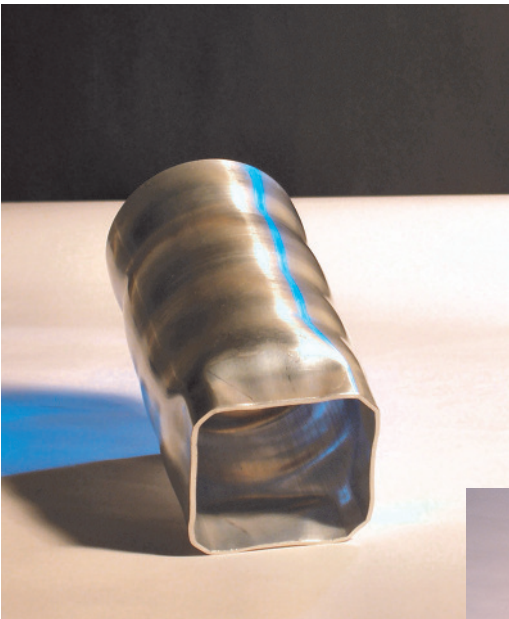

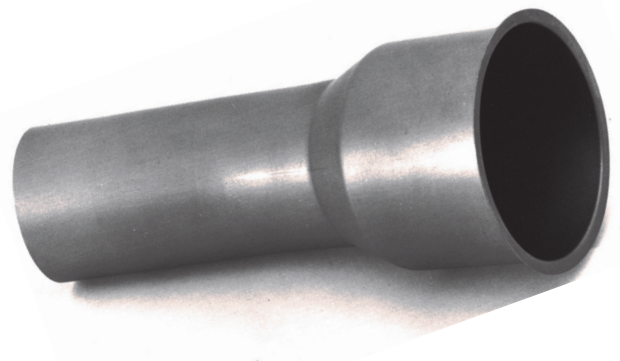

PS32, PS64, PS80 and PS112

Customers:

Industrial and Automotive OEMs and their suppliers

Benefits:

forming and bordering in one step, significant cost reduction,
no operator training required

Shaped and Calibrated tube
